## INNOVATION AS A SOURCE OF ENERGY

European leader in the LED swimming pool market since 2006, SEAMAID applies all its know-how to offer LED lighting solutions with the same ambition: **to provide quality lighting solutions at competitive prices.**

In constant touch with market needs, SEAMAID innovates **day after day.**

**The aim** was to develop new, patented lighting systems that would allow you to enjoy your outdoors to the full.

Today, SEAMAID offers a complete range of floodlights for the pool, the garden and to take anywhere.

### FIVE GOOD REASONS TO CHOOSE SEAMAID

#### 1 High quality, hardwearing products :

When you decide on a SEAMAID projector, you're choosing a lighting system with **very high resistance to impact, heat, and environmental damage.**

#### 2 Product reliability :

All our projectors are certified compliant with standards by TUV RHEINLAND. They also come with a **24-month guarantee based on standard exchange.** All product development at SEAMAID is compliant with current ROHS, REACH and EC requirements.

#### 3 Projectors that are easy to install and use :

With no need for tools or specific equipment, installing a SEAMAID product is child's play ! We've thought of everything to help you, as a professional, **make savings on materials and optimise labour costs.** And our installation help videos are there to assist you with the slightest difficulty.

#### 4 Safety :

To make our in-water lighting even more user-friendly and efficient, **we've developed a unique, specific optic lens.** Our products are classified as zero risk according to standard 62471 (the photobiological safety standard) and are entirely safe for the eyes. Because they don't heat, **there is no risk of burns in the event of direct skin contact.**

#### 5 A committed team to support you :

To support professionals like you as you market and sell our projectors, we have developed a number of tools especially for you: help videos for sales and installation, technical guides and data sheets, our catalogue, and more. And to keep up-to-date with our news and get previews of our latest products, join us on **Instagram, Facebook, LinkedIn and Youtube.**

**If it's additional product information or a practical tip you need,  
our team is always ready to help!**

## LED POOL LIGHTING

No longer just for swimming, **pools have become an integral part of a home's living spaces.**

People all over the world are increasingly using lighting to show it off to its best advantage. But not just any lighting...

So, why should you choose LED lighting?

Allow us to explain!

### FOR YOU, AS PROFESSIONALS:

At the construction stage, projectors **keep installation costs down**: smaller-diameter cabling, less powerful transformers, more flexible cable simplifying connection and completion of works. The advantages are clear.

### FOR YOUR CUSTOMERS:

LED means **cost-effectiveness in use!** With an estimated lifespan of over 20,000 hours, and **low energy consumption** (40W for the most powerful projectors), our LED projectors use less energy than conventional lights.

When you choose LED lighting, you're choosing safety... Because they don't heat, there is no risk of burns with our projectors on direct skin contact while swimming.

Thanks to LED lighting, you can choose between traditional white light, or go for a colourful hues in your pool!

## SERVICE+

You opted for SEAMAID's LED lighting for your pool, and to thank you, we would like to give you **an extra year's guarantee**, free of charge.

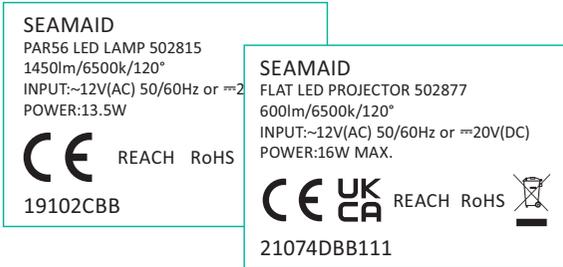

To make the most of this offer, simply select your light in the list and **register it online**.

To do so, all you need is your **proof of purchase** and **manufacturing batch number**.

### Where can your batch number be found?

The batch number can be found on the outer package, on the instruction sheet or on the product itself.

The batch number is always made up of 8 or 11 digits; e.g.: **19102CBB** or **21074DBB111**.

I log on to [www.seamaid-lighting.com](http://www.seamaid-lighting.com) services / extended warranty section

### 4-STEP REGISTRATION

- 1 create your user account
- ↓
- 2 select your light
- ↓
- 3 state your date of purchase and manufacturing batch number
- ↓
- 4 confirm application

## AFTER-SALES SERVICE

If you encounter a problem with the **installation** or **use** of your SEAMAID LED lighting, our specialized teams will work with you to clearly identify your needs and respond in the most appropriate way.

For efficient assistance 24 hours a day, visit the SEAMAID website under customer service / assistance and select your equipment from the list.

## NEW LOYALTY PROGRAM

If you're building, renovating or maintaining swimming pools, or installing equipment such as LED lighting, then this program is for you!

### A loyalty program just for professionals?

Because most loyalty programs are aimed at the end consumer, SEAMAID would like to thank all pool and landscaping professionals in Europe.

Some of you have been installing SEAMAID LED lights for many years, and this program rewards you for your trust and loyalty. You earn points based on the amount you spend on SEAMAID products.

To access rewards such as free products, gift cards, holidays and much more, don't wait any longer to join the program!

### Are you not yet a SEAMAID Pro customer, but would like to take advantage of our loyalty program?

Our loyalty program is open to all professional pool builders who renovate pools, carry out maintenance or install equipment, particularly LED lighting, in Europe.

So join the SEAMAID pro community!

### How does it work?

The products covered by the loyalty program each have a specific number of points depending on their value.

When you buy SEAMAID products from your usual retailer and register them on the SEAMAID website, you earn a certain number of points in return.

You can then convert them into gifts or accumulate them to gain access to greater rewards - the choice is yours!

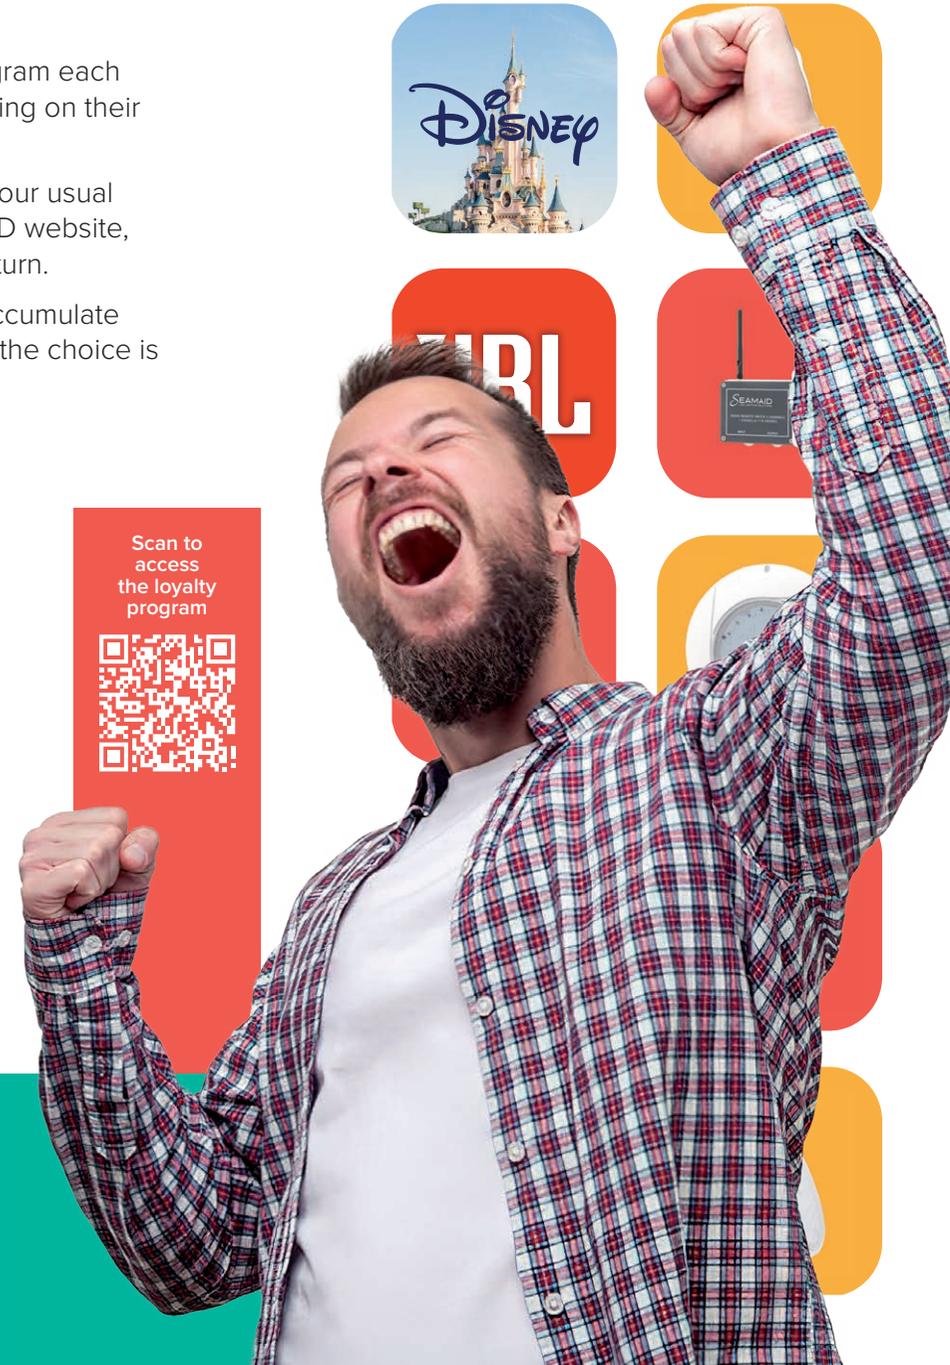

### How to join the SEAMAID loyalty program?

- 1 Log in or create your professional account
- 2 In the menu on the left, click on "My loyalty program"
- 3 Register your products
- 4 Fill in the required fields
- 5 Don't forget to enclose your purchase invoice, so that your application is complete (1 invoice equals 1 registration)

Scan to access the loyalty program

Unlock the biggest rewards by collecting points!

## PROJECTED WITH THEAD

When building a pool, opting for a projector that screws into a 1.5" wall fitting helps limit any risk of watertightness loss caused by a hole in the pool wall, and makes installation easier.

Discover SEAMAID's innovative and patented solutions for the lighting up the main pool, its stairs, its submerged decking or a swim lane.

# FLAT PROJECTOR

LEDINPOOL BY SEAMAID

CONSTRUCTION

[Projected with thread / Back to Contents page](#)

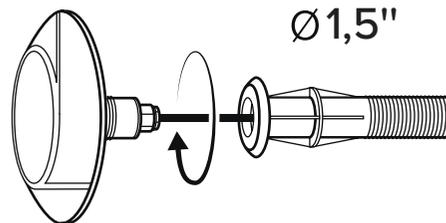

Compatible with all types of pool where installing a conventional projector could cause leakage problems

Easy, safe installation thanks to in-ground pool installation kit included

## Easy to install:

The rear of the plug has a 1.5" male thread, to make it easier to install, as no specialist tools are required. You just need a wall fitting with a 1.5" vacuum fitting at the end, and then screw the rear part of the flat SEAMAID projector into it by hand.

## KIT FOR ABOVE-GROUND POOL

For lighting up your wood or metal above ground pool, SEAMAID offers projectors that are easy to install, directly onto the existing outlet fitting. No need to drill through the pool wall or own any special tools.

Hardwearing

Cost-effective

High-performance and efficient

### Did you know?

The SEAMAID lighting kit comes with a “ready to install” kit case.

### Easy to install:

Simply remove the cover before unscrewing the outlet fitting nozzle. Place the projector’s plate against the wall fitting and screw the nozzle back on. If the nozzle model you are using is unsuitable, use the adaptor provided. Feed the cable under the edge and connect it to the mains.

### Installation steps

## WIRELESS CONTROL MODULE

With no need to modify your electrical installation, SEAMAID wireless control modules allow you to control your pool lighting with complete peace of mind, using the remote control supplied or a smartphone app.

-  Reliable
-  Easy to install
-  Hardwearing

## Did you know?

Fitted with connectors for cable of up to 6 mm<sup>2</sup>, the radio control switch can be installed without any specific work on the projectors' very low voltage power supply

## 1 channel model with 2-button remote control

Ideal for managing several fully synchronised SEAMAID projectors. Simple on/off mechanism for white lighting or for managing colours for RGB. Only operates at low voltage, ~12V(AC) or ~14-24V(DC), with projectors from the SEAMAID range. Wiring up to 2 x 6 mm<sup>2</sup>.

Input(V)	Protection(A)	Power max.(W)
~12V(AC)	20A	12 x 20 = 240W
~14V(DC)	20A	14 x 20 = 280W
~20V(DC)	20A	20 x 20 = 400W
~24V(DC)	20A	24 x 20 = 480W

## Installation kit

### F2''/M2'' extension fitting

501054

ABS threaded extension fitting F2''/M2'' for installing a tubular projector.

### Installation kit for above-ground pools

501009

Kit including a 3-part ABS M50 glued / F25 threaded with a seal and gland. To fix behind a 50 mm vacuum fitting or wall fitting when installing flat projectors or mini projectors.

### Installation kit for in-ground pools

501368

ABS two-part kit comprising an F2'' threaded / F50 glued adapter and F50 glued / M $\frac{3}{4}$  threaded. To be used when installing SEAMAID flat projectors and mini projectors for in-ground pools.

### Cable connection kit

501689

Cable connection kit specially designed for renovation, including a 40 cm watertight heat shrink sleeve, 2 heat shrink connectors and 1 H07RNF 2x4 mm<sup>2</sup> 40 cm cable.

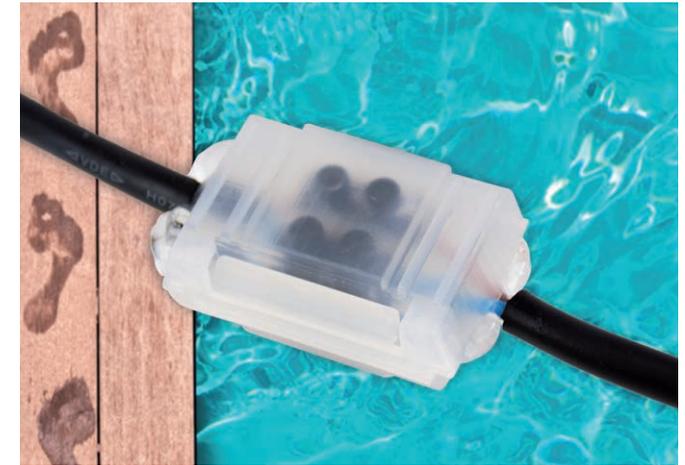

## Gelbox

504338

### SEAMAID makes your electrical installations safe!

With GELBOX, you protect the electrical equipment but also the users of the pool thanks to a box pre-filled with insulating and reusable gel.

To be installed in the connection box of the pool projector but also in any other application requiring protection against splashes, humidity or permanent immersion.

- For 3x1 to 6mm<sup>2</sup> cables
- Non-toxic and non-expiring
- Ready to use
- Halogen free
- UV resistant
- IP68

For professional shops and retail outlets, SEAMAID presents GELBOX in an individual transparent blister pack as well as in a cardboard display of 32 pieces.

## INTRODUCTION

The member states of the European Union are working together to harmonise standards, directives and regulations related to the placing on the market of electrical energy consuming products and their eco-design.

Most of the products connected to the electrical networks are concerned and the regulations resulting from this collaboration between EU member states are applicable from **1 September 2021**, depending on the family to which these products belong.

Because the "lighting" family is concerned, SEAMAID accompanies you to better understand these regulations and the new obligations they entail.

## EU 2019/2020 REGULATION\*

This regulation defines the **ecodesign** rules for a light source including **energy performance, lifetime, power consumption**, ..., to regulate its entry on the market.

The old incandescent and halogen technologies, highly energy consuming, are **no longer allowed to be sold** in Europe.

Incandescent lamp

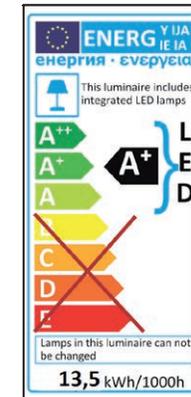

Halogen lamp

**ONLY COMPLIANT LED LIGHT SOURCES CAN BE SOLD**

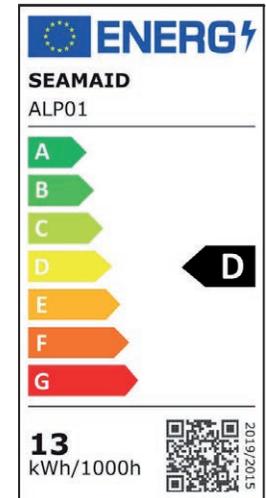

## EU 2019/2015 REGULATION\*\*

This regulation defines the new energy labeling of a light source and replaces the previous regulation EU 874/2012 applied since 2013.

Old label  
EU 874/2012

New label  
EU 2019/2015

- New harmonised energy classification for all product families
- Mandatory declaration in the European EPREL database
- Associated QR code to access the light source data sheet online
- Easy verification by market surveillance authorities or by the end user before purchase

\*\* <https://eur-lex.europa.eu/legal-content/FR/TXT/PDF/?uri=CELEX:32019R2015>

## SEAMAID LIGHTINGS

SEAMAID projectors and lamps are luminaires containing an extractable LED light source in either white or RGB lighting.

SEAMAID RGB light sources not producing white colour and those operating solely on battery power are not impacted.

The new classification is indicated on packaging, in notices, catalogues and data sheets of luminaires using the simplified energy class symbol and the associated QR code.

**SEAMAID OFFERS YOU THE OPTIMUM IN ENERGY-EFFICIENT LED LIGHTING.**
